### Makeover, redesign, website redesign

**Your web site needs a more current or more professional look? Offer him(her) a session of relooking or reshape him(it) completely!**□□□□□□□□□□□□

**Of the simple change of appearance (by keeping(guarding) possibly the main lines of your current site) for the complete revision, we take care with giving a new youth to your Web site.**

**What are the differences between an update, a relooking and a revision of web site? There are no official definitions, but we propose this:**

**\* Update: the general appearance of the web site does not change, only texts and images of illustration are modified. We can possibly add pages□ on the model of the existing pages.**

**\* Relooking or new look: the general appearance ( the dressing) of the Web site is modified, but texts and images of illustration remain generally unchanged.**

**\* Revision or reorganization: The website is completely recreated. Pages are added or removed. Some elements (texts and pictures) from the old version can be reused.**

**Example Makeover :**

The image shows a screenshot of a web form titled "Formulaire de réservation" (Reservation Form). The form is set against a dark blue background with white text and input fields. At the top, there is a header with the title and a subtitle. Below this, there are several sections of input fields: a name field, a phone number field, an email field, a date field, a time field, a dropdown menu for "Type de réservation", and a large text area for "Commentaires". There are also several buttons, including a prominent red "Reserver" button at the bottom right. The form is partially obscured by a dark overlay on the left side.
